About Us

Melanie Lee has 21 years experience in the pharmaceutical industry, from a laboratory bench level scientist starting in Glaxo and GlaxoWellcome, through to Executive VP of Research and Development (R&D) and a FTSE100 company plc Board position in Celltech/UCB. Her responsibilities extended to 2500 people.

Melanie's prior experience was 9 years in academia as a PhD student and post-doctoral scientist with the leading cancer charities of the UK (CRC and ICRF). She now holds voluntary positions which combine her knowledge of industrial drug R&D and academic science, as Chairman of Cancer Research Technology and as a Trustee and Deputy Chairman of Cancer Research UK.

Think10

Melanie founded Think10 to help you make the most of yourself and to make the right choices in and for your business. Melanie's focus is on people as individuals and the work they do in teams. She has always developed peoples' careers and built high performance, productive teams.

Melanie has experience of six major corporate mergers and knows how disruptive these can be to creativity and team work. She has studied creativity and the essential ingredients for creative and innovative environments and is passionate about the importance of emotional intelligence as an essential leadership skill.

Think10 will work with you 1:1 or with your organisation and teams. Think10 will find and engage other professionals to work with you, bringing in essential skills for the situation at hand.

Melanie Lee
PhD, CBE, FMedSci, DSc (Hons)

tens experience encompasses virtually all aspects of corporate & R+D business development and business strategy

The team at ten have wide experience in the international pharmaceutical industry has encompassing virtually all aspects of corporate & R+D business development, focusing primarily upon the crucial area of drug discovery and development. Including experience throughout the R & D value chain (gained in both large and small companies, world wide) and developing large and small molecule drugs.

Through the medium of Think 10, Melanie Lee and think ten are now ready to assist organisations with projects that could range from basic scientific understanding, to more complex strategies for the enhancement of drug discovery pipelines, or managing scientific teams through periods of corporate upheaval.

Success is achieved by surrounding yourself with people focused, high energy, creative teams.

10 to the power of 10 is our business motto. Allowing creative people to expand - within the team ethos - to deliver performance and results unachievable by a set of individuals working independently - no matter how highly skilled they may be.

Think 10 now brings that concept to young organisations or individual entrepreneurs, companies faced with strategic problems, or senior executives with thousands of people to motivate. Think 10 can work with you either on a one to one basis or via a programme of team coaching.

Reach Out & Connect

Think10 is a network. It's a network of coaches and experts from a vast range of fields and life experiences. You can join the network too – just contact us if you wish to contribute your skill to others. Using Think10's own philosophy, We like to work in teams where everyone is at their best, contributing their strength. Whether it is the changing face of the pharmaceutical industry and the need to reach out and connect with other industries that have revolutionised their business model, or an expert in a specialisation that is sought – ask Think10. Think10 will find the team you need to deliver the support, options and solutions you need.

Experts signed up to working on Think10 projects cover the all aspects of the pharmaceutical industry's processes like specialist CMC expertise for biological drugs, expert coaches and interim executive managers with experience of many industries.
